

Thema: Winkelfunktionen im rechtwinkligen Dreieck		Grundkompetenz: AG 4.1
Name:	Schwierigkeitsgrad: leicht	Klasse:

1. Kreuze die richtigen Aussagen an. ($\gamma = 90^\circ$)

A	$\sin(\epsilon) = \frac{y}{z}$	<input type="checkbox"/>
B	$\cos(\beta) = \frac{z}{x}$	<input type="checkbox"/>
C	$\tan(\beta) = \frac{y}{z}$	<input type="checkbox"/>
D	$\tan(\epsilon) = \frac{y}{z}$	<input type="checkbox"/>
E	$\sin(\epsilon) = \frac{z}{x}$	<input type="checkbox"/>

2. Kreuze die richtigen Aussagen an. ($\gamma = 90^\circ$)

A	$\sin(\delta) = \frac{b}{a}$	<input type="checkbox"/>
B	$\cos(\omega) = \frac{b}{a}$	<input type="checkbox"/>
C	$\tan(\omega) = \frac{c}{b}$	<input type="checkbox"/>
D	$\tan(\delta) = \frac{a}{c}$	<input type="checkbox"/>
E	$\cos(\omega) = \frac{b}{a}$	<input type="checkbox"/>

Thema: Winkelfunktionen im rechtwinkligen Dreieck Lösungen		Grundkompetenz: AG 4.1
Name:	Schwierigkeitsgrad: leicht	Klasse:

1. Kreuze die richtigen Aussagen an. ($\gamma = 90^\circ$)

A	$\sin(\epsilon) = \frac{y}{\sqrt{x^2}}$	<input type="checkbox"/>
B	$\cos(\beta) = \frac{z}{\sqrt{x^2}}$	<input checked="" type="checkbox"/>
C	$\tan(\beta) = \frac{y}{\sqrt{x^2}}$	<input checked="" type="checkbox"/>
D	$\tan(\epsilon) = \frac{y}{\sqrt{x^2}}$	<input type="checkbox"/>
E	$\sin(\epsilon) = \frac{z}{\sqrt{x^2}}$	<input checked="" type="checkbox"/>

2. Kreuze die richtigen Aussagen an. ($\gamma = 90^\circ$)

A	$\sin(\delta) = \frac{b}{\sqrt{a^2}}$	<input checked="" type="checkbox"/>
B	$\cos(\omega) = \frac{b}{\sqrt{a^2}}$	<input type="checkbox"/>
C	$\tan(\omega) = \frac{c}{\sqrt{a^2}}$	<input checked="" type="checkbox"/>
D	$\tan(\delta) = \frac{a}{\sqrt{b^2}}$	<input type="checkbox"/>
E	$\cos(\omega) = \frac{b}{\sqrt{a^2}}$	<input checked="" type="checkbox"/>
