

Unit 17 Touch it ... Feel it ... See what it's made of

Task 03

Announcer: Listen to Adriana, Olga and Christina talking about their clothing products.

Olga: Hey Adriana, Christina! Have a look at this summer dress. It's a very pretty cotton and silk fabric, which should be cool on hot days.

Adriana: Oh that's elegant, but too good for just wearing around the house ... what about these light blue, loose fitting trousers.

Christina: What are they made of? I only like things made from natural fibres.

Adriana: It says on the label 100% cotton denim. There's a matching light blue leather belt, too.

Christina: Oh they look great! Over here, there's a mix-and-match set of 3 T-shirts that come in round or v-neck designs ... and they're made of a soft cotton-jersey material in lots of different colours. Perfect!

Adriana: This ladies' blazer is made of a very soft wool fabric, which would match with the trousers perfectly. What do you think Olga?

Olga: I think I'd still prefer to have a skirt or dress. What do you think of this knee-length skirt? It says it's made of 50% cotton and 50% viscose, which is easy-care material, just wash and drip-dry ... no ironing!

Christina: That'll look good on you, but I don't think I'd wear it because it has man-made fibres in it. Actually, I don't mind ironing ... I find it relaxing while watching my favourite DVDs!

Adriana: I hate ironing, especially my linen and cotton trousers. I wonder if they have trousers that are made of easy-care material, too, like that skirt, Olga.
