

Unit 4 – This is the company I work for

Task 03 – Match the pictures and the jobs.

KV zur Differenzierung: Schneiden Sie die Bilder, Bezeichnungen und Definitionen aus und lassen Sie sie von schwächeren Schülerinnen und Schülern zuordnen.

		
road construction	private and public buildings	timber construction technology
This means planning routes through beautiful landscapes, small bicycle trails or motorways.	These are hospitals, event centres, schools, museums or private houses.	Wood is used for construction purposes as it is ecological, flexible and can be used in many ways.
		
tunnelling	power plants	laying underground pipelines
Some are built for underground trains, others lead cars or railways through a natural barrier.	These are all kinds of stations that produce electricity.	A lot of this work is done underground, several meters under the surface.
		
interior completion	planning process	bridges
This process includes mounting drywalls, laying flooring or tiling walls.	Before actually starting a project, a lot of measuring and drawing is necessary.	They are built to connect two points over a river or in mountainous areas to cross valleys.
