

# Books

## 1 Language in use: Books as they might be seen in 2080

Read the text about the possible future of printed books. Some words are missing. Choose the correct answer (A, B, C or D) for each gap (1–10). Put a cross (☒) in the correct box. The first one (0) has been done for you.

Today I am going to tell you something about a new ...

(0): It is called books. You may be used to ... (1) readers, but books are really special.

When reading on your reading ... (2) you cannot turn the page physically. But when you take a book into your hands you can ... (3) the paper – and you will see, paper does not always feel the same. This is an exciting ... (4). No eBook reader can provide that. The screen will always be the same, maybe the colour, the fonts and the layout changes, but the surface is always some kind of glass.

And if you want to add ... (5), you take an old-fashioned stylus (it used to be called a pencil) to mark and write on the page. These notes are really personal and nobody can see them ... (6) they have the book in their hands.

Another feature of books is that you do not need to ... (7) the book every now and then. You just take it and read it. It is as simple as that. And don't we need more of these simple things in our world filled with digital helpers?

And there is another ... (8) we should not forget: digital books cannot be passed on as they are copyright ... (9). Books, however, can be given to someone else as a present or they can be shared. Isn't that ... (10)?
