

Unit 19 Are you safe and sound at work?

Task 06

Announcer: Listen to the second part of the lecture.

Inspector: Now let me tell you about some important rules and signs. In case of a fire or any other evacuation, you will be informed by a signal. Then you must immediately stop all work and turn off all electrical equipment. Follow the emergency exit signs and go to the designated assembly points. Walk, don't run! Follow all the instructions of your supervisor. If necessary, you can find a fire extinguisher following all respective signs.

If a customer or a colleague is seriously injured, you must call the ambulance immediately. Look for the first aid signs to find a medical kit and report the injury to your supervisor.
