

Lösung Beispiel 858.) b.)

$$h = 20,9 \text{ cm} \quad h_a = 24,1 \text{ cm}$$

$$\sin(\alpha) = \frac{h}{h_a} \quad \rightarrow \quad \alpha = \sin^{-1}\left(\frac{20,9}{24,1}\right) \approx 60,14^\circ$$

$$\gamma = 90^\circ - \alpha \quad \rightarrow \quad \gamma \approx 29,86^\circ$$
